

## **Business information resources: Securing value and quality**

10:15-13:00, Friday, 19 February 2010

Library, DIT Aungier Street

This specialised, subject-based workshop will evaluate full text, data and discovery resources in business, management and economics. An initial presentation will consider issues of quality, coverage and cost for the main resource types. These resources will then be considered by workshop participants to finalise coherent sets of materials around which collections can be developed.

After this workshop you will:

- Command a comprehensive overview of the leading discovery, full text and data resources in business-related fields, and their relative costs;
- Be able to clearly identify better value options; and
- Be able to make informed decisions on selecting resources adapted to local needs.

The workshop is aimed at librarians active in subject/liaison work, decision-making on resource acquisition, and research support. It is a re-run of our highly successful workshop event last December.

**LIR Workshop Series**

**Programme:**

- 10:15-11:15:      *Presentation – ‘Overview of major business resources:  
Evaluation of quality and cost’*  
David Meehan, Business Librarian, DCU
